Projects

Semantic Evidence Extraction Tool | Python, NLP, Streamlit | [Git](#)

- Built and deployed a two-stage NLP-based tool to extract structured evidence from large document collections
- Designed the full pipeline from document ingestion to ranked output (embedding, retrieval, re-ranking)
- Designed an interactive application (proof-of-concept version) used to support research synthesis and reduce manual review time. Live at [link](#); deterministic alternative to generative AI tools for academic research
